University of Agriculture, Faisalabad

Oct 2024 – Expected 2028

Bachelor of Science in Software Engineering (CGPA: 3.78/4.00)

Key Coursework:

- Data Structures & Algorithms | Database Management Systems
- Object-Oriented Programming (OOP) | Software Engineering Principles
- Visual Programming | Algorithm Analysis & Design

Experience

Frontend Web Developer | CodeFusion

Aug 2025 – Aug 2026

Faisalabad, Pakistan

- Developed, tested, and deployed responsive web interfaces using React.js, JavaScript (ES6+), and modern CSS frameworks.
- Collaborated with cross-functional teams to translate UI/UX designs into modular, reusable, and performant React components.
- Optimized web application loading speed, user interaction flows, and cross-browser compatibility across multiple projects.

Frontend Developer Intern | CodeFusion

May 2025 – Jul 2025

Faisalabad, Pakistan

- Assisted in building custom frontend components and integrating RESTful APIs using JavaScript and React.js.
- Fixed UI/UX bugs, refined mobile responsiveness, and participated in daily code reviews to maintain code quality.

Projects

Ashion – E-Commerce Web Store | React.js, CSS3

- Engineered a modern frontend e-commerce web platform featuring product listing catalogs, interactive category filters, and smooth page routing.
- Implemented client-side shopping cart functionality with dynamic item quantity updates, real-time price calculations, and state persistence.
- Built modular, reusable React functional components and fully responsive custom CSS layouts for seamless browsing.

Mophy – Admin Dashboard Application | React.js, MUI, Tailwind CSS

- Designed an administrative dashboard interface using Material UI and Tailwind CSS for scalable component styling.
- Integrated interactive data visualization tables, navigation sidebars, and analytical card layouts for optimized UI/UX.
- Structured dynamic routing and responsive views tailored for complex data management tasks.

Real-Time Weather Application | JavaScript (ES6+), REST API, HTML5, CSS3

- Developed an asynchronous web application fetching live meteorological data via OpenWeatherMap REST API using Fetch/Async-Await.
- Implemented dynamic search functionality, custom weather condition icons, and robust client-side error handling.
